

E-GOV 2001 AWARDS E-GOVERNMENT PIONEERS

Wednesday, May 16, 2001

Government and Industry Honor 20 Agencies Selected From a Record 295 Nominees

Reston, Virginia – May 16, 2001 – E-Gov 2001 (www.e-gov.com), the International Electronic Government Conference and Exposition, announced today that 20 government agencies will be honored with "Pioneer Awards" for best practices in E-Government. These winning programs were selected from an impressive field of nearly 300 nominations from government organizations at the federal, state, and local levels, as well as a number of international submissions.

The E-Gov 2001 Pioneer Award winners will demonstrate their outstanding applications and present Best Practice Briefings in the Government Solutions Center (GSC), during the E-Gov 2001 Exposition, July 10-11, at the Washington Convention Center, Washington D.C. Secretary of Commerce, Donald L. Evans, is the invited keynote speaker for the E-Gov 2001 Pioneer Awards luncheon on July 12th.

A focal point of E-Gov 2001, the GSC is sponsored by Accenture and features live demonstrations of winning applications ranging from online vehicle license renewals, to E-Procurement engines, to improved infrastructure for tax processing. "This year, we've seen an increase in the use of portal technology to provide a single face of government to citizens, businesses, and other agencies," says Stan Gutkowski, managing partner for Accenture's Federal Government Practice. "We've also seen an increase in the level of sophistication of the solutions," he added. "For example, customer relationship management is emerging as a means of tailoring services for each individual user."

The third annual E-Gov Pioneer Awards recognize public sector professionals who have developed innovative Electronic Government programs that increase productivity, save limited public resources, and improve the quality, timeliness, and accuracy of citizen services. This year's Selection Committee includes representatives from the General Services Administration, the Defense Technical Information Center, and the U.S. Department of Commerce, Fairfax County, Virginia, as well as representatives from industry and Federation of Government Information Processing Councils (FGIPC).

"E-Government applications definitely are getting more comprehensive and complex," says Carlynn Thompson, a member of the Selection Committee, as well as Director of the Research Development, and Acquisition Information Support Directorate in the Defense Technical Information Center. "Initially, the majority of agencies were simply publishing information on the Web. Now, we are seeing really good examples of how they are taking advantage of the technology and using it in a way that impacts the world."

The following agencies will be recognized at the E-Gov 2001 Pioneer Awards on Thursday, July 12, from 12:30 p.m. – 2:30 p.m. at the Washington Convention Center:

"The E-Gov 2001 Government Solutions Center offers an interactive glimpse into the most innovative E-Government applications in use today," said Chuck Lockard, General Manager and Co-Founder, E-Gov, a 101communications Company. "The Electronic Government applications showcased in the GSC are the models for effective service delivery, efficient operations, and optimized technical infrastructures."

In response to overwhelming demand, nearly triple the number of nominations received last year, the GSC Selection Committee added a new category of award, acknowledging 10 E-Government programs as "Explorers." These 10 winning programs also will host kiosks in the Government Solutions Center during the E-Gov 2001 Exposition.

The Selection Committee also named 22 additional programs as E-Gov 2001 "Trailblazers." These awardees represent a tier of exceptional public sector solutions that merit recognition in the E-Government community. For a full list of all award recipients, visit www.e-gov.com.

About E-Gov Events

With a focus on the skills, applications, and technology needed to transform the way government does business, E-Gov events bring together public sector and industry partners to identify opportunities, create innovative solutions, and implement effective online service delivery for citizens. A combined faculty of more than 500 nationally-recognized authorities leads the six annual E-Gov Conferences – programs of continuing educational sessions devoted to government at work in the electronic century. Featuring exhibits by government programs and industry information technology providers, the E-Gov Expositions showcase products and services dedicated to public sector Electronic Government initiatives. In tandem with each Conference, E-Gov offers a free professional education program for all attendees. For more information and to register for E-Gov 2001, visit www.e-gov.com.

Press Registration: Please contact Maureen O'Keeffe at mokeeffe@okeeffeco.com or 703-883-9000 ext. 110 with questions and to register.
